SUPPLEMENT TO 25X1A  
REPORT NO.

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

1. It is believed that the developmental work of the Central Institute for Radio Technique (Zentral Institut fuer Funktechnik) includes jamming, radar development, and ultrasonic problems. Such projects are directed by the Main Administration for Wireless Communications (HV Funk) of the Ministry for Post and Telecommunications. Matzke (fuu), Adler (fuu), and perhaps Andreas (fuu) are responsible for this type of work.
2. The following three plans for reorganizing HV Funk exist:
  - a. An amalgamation of HV RFT and HV Funk to form a state secretariat with autonomous powers (mit eigenem Geschaeftsbereich). The state secretariat was to be called the State Secretariat for Wireless Communications and Radio Technology (Staatssekretariat fuer Funkwesen und Radiotechnik) and all appropriate plants were to be placed under it. This plan was soon abandoned, however, because State Secretary Schroeder and HV Director Matzke are not technically capable of managing a state secretariat, and both would be happy to rid themselves of the responsibility of running the plants now under HV Funk.
  - b. Incorporation of all RFT plants into HV Funk, without, however, forming a state secretariat.
  - c. Transfer of all plants now under HV Funk to HV RFT. This plan was implemented in early May 1953, and its results will become apparent beginning 1 July 1953. According to this plan HV RFT, now under the Ministry for General Machine Construction, would have authority over all radio plants and telecommunications and radio-technical factories.
3. It is to be assumed that research and development work on telecommunications is concentrated in the Central Institute for Radio Technique and that the central supervisory organ for such work will continue to be the HV Funk, especially after its planned reorganization.

4. VEB Funkanlagen is under HV Funk. It is managed by Department 21.00, which is directed by Doeller (fnu). The plant is responsible only for the assemblage of construction components which are in themselves complete devices. It receives on a continuing basis assembly ~~crews~~, which carry out the plant's tasks. VLB Funkanlagen is located in the plant complex of Funkwerk Koeperick.
